

MYTON INDUSTRIES

ROAD CASE LINE

BUILT FOR YOU. MADE TO LAST.

The Myton SC/RC Series Road Case

The Myton SC/RC Series road case line is built for operations where standard containers simply aren't enough. Available in static (SC) and mobile rolling (RC) configurations across two capacities, every unit in the lineup combines a reinforced 14-gauge steel internal frame with seamless polyethylene construction — delivering 850 lbs of load capacity and 800 lbs of stacking strength in a package that resists moisture, chemicals, and the punishment of demanding transport environments.

Every SC/RC case features a double-wall lid with molded wheel pockets for secure stacking, four spring-loaded rubber grip chest handles, and dual pad-lockable wing turn latches for quick, secure closure. RC models add four-corner heavy-duty polyurethane casters mounted on a recessed 3/4" painted plywood base for confident floor mobility. The internal powder-coated steel frame provides rigid structural support through repeated loading, stacking, and transit cycles without compromise.

Built to Your Specification

Available with FDA-approved materials in select colors, the SC/RC Series can be configured to meet specific operational or compliance requirements. Whether you're securing critical supplies across a facility or stacking units in a storage environment, the molded lid wheel pockets ensure stable, secure stacking during transit or storage. Proudly made in America with over 50 years of Myton craftsmanship behind every unit.

MYTON ROAD CASE LINE

SC-4524, Road Case, 8 Bushel, 45" x 22.5" x 25"

The SC-4524 road case delivers 8-bushel capacity in a 45" x 22.5" x 25" footprint engineered for static transport and storage demanding. A reinforced 14-gauge powder-coated steel frame and double-wall hinged lid provide robust protection, rated at 850 lbs load capacity and 800 lbs stacking strength. Four rubber grip handles and dual pad-lockable twist latches keep contents secure and accessible. Available with FDA-approved materials in select colors.

MODEL	OUTSIDE TOP DIMENSIONS	INSIDE TOP DIMENSIONS	WEIGHT CAPACITY	SHIPPING WEIGHT	VOLUME CAPACITY
SC-4524	L45"xW22.5"xH25"	L43.5"xW21"xD19"	850 lbs	55 lbs	10 cu. ft. 75 gal 8 bushels

RC-4524-H4, Road Case, 8 Bushel, 45" x 22.5" x 31"

The RC-4524-H4 puts the SC-4524's 8-bushel capability on wheels, adding a 3/4" painted plywood base with four 4" heavy-duty polyurethane casters for effortless floor mobility. At 45" x 22.5" x 31", it maintains the same 850 lb load and 800 lb stacking ratings as its static counterpart, with four rubber grip handles and dual pad-lockable twist latches ensuring secure handling whether rolling or lifting. Built with FDA-approved materials in select colors.

MODEL	OUTSIDE TOP DIMENSIONS	INSIDE TOP DIMENSIONS	WEIGHT CAPACITY	SHIPPING WEIGHT	VOLUME CAPACITY
RC-4524-H4	L45"xW22.5"xH31"	L43.5"xW21"xD19"	850 lbs	103 lbs	10 cu. ft. 75 gal 8 bushels

SC-4534, Road Case, 12 Bushel, 45" x 30" x 27.3"

The SC-4534 steps up to 12-bushel capacity in a wider 45" x 30" x 27.3" footprint — the right call when volume matters as much as strength. A 14-gauge powder-coated steel frame and double-wall hinged lid back up an 850 lb load rating and 800 lb stacking strength, while four rubber grip handles and dual pad-lockable twist latches deliver the same reliable security across the line. Available with FDA-approved materials in select colors.

MODEL	OUTSIDE TOP DIMENSIONS	INSIDE TOP DIMENSIONS	WEIGHT CAPACITY	SHIPPING WEIGHT	VOLUME CAPACITY
SC-4534	L45"xW30"xH28"	L43.5"xW27.5"xD21"	850 lbs	75 lbs	15 cu. ft. 112 gal 12 bushels

RC-4534-H5, Road Case, 12 Bushel, 45" x 30" x 34"

The RC-4534-H5 scales the 12-bushel SC-4534 platform for heavy-duty mobile use, mounting on four corner-placed 5" heavy-duty polyurethane casters on a 3/4" painted plywood base. The larger caster package — stepped up from the H4's 4" wheels — handles the increased demands of the wider, higher-capacity unit across a 45" x 30" x 34" footprint. Rated at 850 lbs load and 800 lbs stacking, with four rubber grip handles and dual pad-lockable twist latches throughout. Built with FDA-approved materials in select colors.

OPTIONS & UPGRADES

BASE UPGRADES

Upgrade your Myton container's foundation to match the demands of your environment. The standard 3/4" painted plywood base can be upgraded to a galvanized steel base for superior corrosion resistance, a forkliftable base for seamless material handling, or a galvanized steel base with forklift tines — combining durability and mobility in one rugged solution.

CASTER UPGRADES

Myton's standard poly-on-poly four-swivel caster configuration is just the starting point. Upgrade to casters with brakes, two rigid/two swivel configurations, poly-on-steel, semi-pneumatic, thermo rubber, or polyolefin options — each suited to different floor conditions and load requirements. Six-caster sets are also available for heavier or oversized containers demanding extra support.

DOCUMENT POUCHES & DECORATION

Keep your containers organized and identifiable with Myton's stenciling and document pouch options. Stencil your company name, custom text, or sequential numbering in 1" or 2" capital letters on opposite corners. Heavy-duty reinforced vinyl document pouches feature a clear front panel and hook-and-loop closure, available in three standard sizes — with custom sizes and styles available subject to minimums.

DIVIDERS & INSERTS

Whether you need part protection from shock and vibration, improved load distribution, or organized kitting, Myton delivers an economical solution. Divider materials are selected for durability and include plastic, polyurethane foam, wood, and die-cut corrugated plastic.
