Level and 32" Lower Level**

**One Lower Shelf With 32" Upper
Level and 16" Lower Level**

**Three Shelves with Four
16" Levels**

Custom Shelving

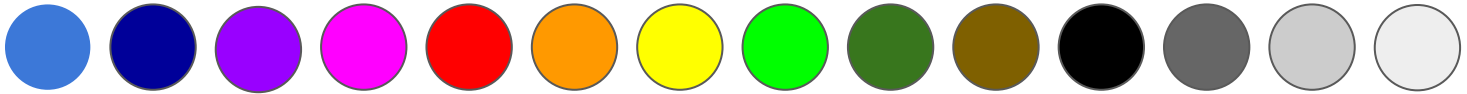

No Shelves

SECURITY CART OPTIONS & UPGRADES

FOURTEEN COLORS

DOOR OPTIONS

Myton RTC security carts come standard with ABS laminated plywood doors and lockable twin recessed barrel bolt locks — providing rigid, professional-grade closure right out of the box. For operations with different requirements, upgrade options include 1/4" polyethylene panels, clear polycarbonate for visual confirmation of contents without opening the cart, and reinforced vinyl with locking zipper where rigid panels aren't needed.

SHELVES & DIVIDERS

Myton RTC security carts support one, two, or three interior shelf levels depending on model — the RTC-4829 accommodates up to two, while the RTC-5829 and RTC-6829 support up to three — with custom configurations available across the line. Shelf materials include painted plywood, steel-reinforced poly, and custom options tailored to your specific storage requirements, keeping contents organized, accessible, and secure.

CASTER UPGRADES

The RTC ships standard with four corner-mounted poly-on-poly casters in a two swivel, two rigid configuration — balancing maneuverability and directional stability under heavy loads. Upgrade to casters with brakes, poly-on-steel, semi-pneumatic, thermo rubber, or polyolefin options suited to different floor conditions and load requirements. Six-caster sets are available for heavier or oversized containers demanding extra support.

BASE UPGRADES

Upgrade your Myton container's foundation to match the demands of your environment. The standard 3/4" painted plywood base can be upgraded to a galvanized steel base for superior corrosion resistance, a forkliftable base for seamless material handling, or a galvanized steel base with forklift tines — combining durability and mobility in one rugged solution.
